The Complete Solution

## **ICELAN<sup>TM</sup> 2000** Product Overview

ICELAN 2000 Version 5.0 is your high performance, low cost, LONMARK<sup>®</sup> compatible, solution for managing all open, interoperable, multi-vendor, LONWORKS<sup>®</sup> technology applications. ICELAN 2000 is a powerful Windows<sup>®</sup> 95/98/NT/2000/XP compatible product that is built on a 3-tier client/server architecture providing network management, network configuration, and network diagnostic functionality regardless if you are operating locally, remotely over LONTALK<sup>®</sup>, or remotely over IP. ICELAN 2000 is easy to use on all existing LONTALK networks regardless of what tool was originally used to install the network and there are **NO** per node royalties.

IEC's ICELAN 2000 provides the capability to develop and maintain LonTalk networks at your desk or at the site. You can connect remotely over the Internet without the cost of an IP router and quickly install, configure, manage, and maintain your network. ICELAN 2000 is designed to: 1) Fully support the LONWORKS environment, 2) Provide high performance network management, 3) Provide low cost network management, 4) Provide client/server capability regardless if the user is local, remote over LonTalk, or remote over IP, 4) Provide support for all new and existing LONTALK networks, 5) Visualize and interact with LONWORKS applications. The ICELAN 2000 architecture provides a total, technically superior, integrated, and flexible solution. ICELAN 2000 is built on top of IEC's Peak Components<sup>TM</sup> and provides dramatic performance and cost advantages over LNS based tools. ICELAN 2000, "The complete solution".

### **Point and Click Network Management:**

- Install Devices
- Create and/or modify bindings
- Configure Devices
- View **ALL** device properties
- Download Applications
- Import .XIF files (not required for install)
- Discover Existing Networks
- LonMark Device Resource File support
- Configuration Templates
- Read/Write all Network Variable Types
- Read/Write all Configuration Parameter Types
- Track all Application Configuration Data

### **Graphical Representation of LONWORKS Networks:**

- Familiar Windows Explorer Views
- Easy to use Point and Click, Drag/Drop functionality
- Device Status Icons
- Unlimited Number of Browser Views

### **Network Diagnostic:**

- Test Devices
- Place Devices Online or Off-line
- Reset Devices
- Replace Devices
- Display **ALL** Device Properties
- Maintain Device Configuration
- Download Applications
- Discover Devices

### **Network Variable Browser:**

- Browse and Modify all Network Variable Types
- Browse and Modify Configuration Property Types
- Display using LonMark Device Resource Files
- Range Validate using LonMark DRF Type File
- Configure Nodes
- Validate Node Operation
- Provides scheduled Polling of Network Variables
